## Proceedings UrbanFlood Workshop 2011

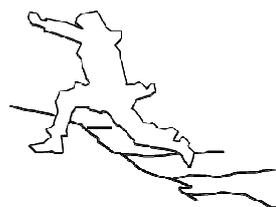

### Work Package 7 – D7.8

version 1.0, January 2012

## URBAN FLOOD

A project funded under the EU  
Seventh Framework Programme  
Theme ICT-2009.6.4a  
ICT for Environmental Services and  
Climate Change Adaption

Grant agreement no. 248767  
Project start: December 1, 2009  
Project finish: November 30, 2012

Coordinator

Urban Flood Project Office at TNO-ICT  
Prof dr Robert J. Meijer

Eemsgolaan 3  
PO Box 1416  
9701 BK Groningen  
The Netherlands

## 1 Introduction

Deliverable 7.8 is available on a cd which can be send separately or distributed during the review meeting.

The same information (and more) is available on the UrbanFlood website on this link

<http://www.urbanflood.eu/Pages/Workshop2011.aspx>

The following information is available there:

- Program
- List of participants
- Abstracts
- All presentations

Annex 1 provides the “assessment” (C.f. D2.3) table for this deliverable.

### 1.1 UrbanFlood

UrbanFlood is a project investigating the use of sensors within flood embankments to support an online early warning system, real time emergency management that UrbanFlood is developing. It is a project under the EU 7th framework Programme which started in December 2009 and will run for 3 years. Partners of UrbanFlood include TNO Information and Communication Technology, the University of Amsterdam and STOWA (Dutch acronym for the Foundation for Applied Water Research) from the Netherlands; HR Wallingford in the UK, ACC Cyfronet AGH in Poland and OOO Siemens in Russia.

## **Annex 1**                      **Assessment of Deliverable 7.8**

<b>Relevance</b>	<p>showing the extent to which the deliverable contributes to the UrbanFlood goal</p> <p><i>D7.8 is the proceedings of the 2<sup>nd</sup> UrbanFlood workshop as is required by the DOW. We consider both the CD and the workshop webpage on the UrbanFlood website to be part of D7.8</i></p>
<b>Efficiency</b>	<p>showing the amount of MM and resources spent in relation to the planned results.</p> <p><i>It is difficult to estimate the amount of time spent in creating D7.8; the concept of D7.5 was used and compiling the CD was relatively easy; preparing the content (as far as this was done by UrbanFlood partners) has taken more time, as has the organization of the workshop itself. We consider the workshops to be very efficient and effective ways to share information and results of UrbanFlood.</i></p>
<b>Effectiveness</b>	<p>showing the extent to which the objectives were achieved, or are expected to be achieved, and related to the WP task list, deliverable and milestone list</p> <p><i>The objective of D7.8 was to produce a record of the UrbanFlood workshop, and to allow interested stakeholders to know what was presented there, even if they could not participate in person. It is a very effective tool to disseminate results and information on the project.</i></p>
<b>Impacts</b>	<p>being a qualified description in how far the deliverable progresses the UrbanFlood project to its goal.</p> <p><i>D7.8 is one of the required deliverables. It contributes to objective 1 and somewhat less to objective 5.</i></p>
<b>Sustainability</b>	<p>being a list of efforts for the continuation of the results described in the deliverable in the forthcoming years, after the UrbanFlood task is completed.</p> <p><i>Spreading information on the system will increase the probability that the system will be taken up and implemented.</i></p>
<b>Coherence</b>	<p>description of the relevance of the deliverable for external stakeholders</p> <p><i>The objective of D7.8 was to produce a record of the UrbanFlood workshop, and to allow interested stakeholders to know what was</i></p>

*presented there, even if they could not participate in person. It is a very effective way for external stakeholders to share in the results of the UrbanFlood project.*

**Quality**

where appropriate a list of descriptions, performance tests, requirement checks, interworking tests, model cross validations, publications, interviews, expert opinions, experimental outcomes

*The deliverable itself (the CD) gives a good idea of the quality of the dissemination at the workshop. While the workshop was not the deliverable the proceedings can be seen as a representation of the (results of the) workshop.*
